

Corrective Action Plan Supplemental Question

To complete this form:

1. Enter your response.
2. Click "Save" at the bottom of the form to save your response.
3. To submit your report, return to the dashboard, go to the Required Reports section, and click the Corrective Action Plan Report "submit" button.

Note: Please review your response if you are copying and pasting from Word. There may be some compatibility issues that will need to be edited.

Please complete the following Corrective Action Supplemental Plan question:

Describe which of the required and permissible Corrective Actions will be taken in SI Year 3 and the rationale for how the school anticipates it will improve academic achievement outcomes. (See 34 CFR 200.42(b)(4).)

Kentuck provides all students the option of public school choice. Supplementary Educational Services are available to eligible students. The school continues to receive technical assistance from the LEA and SEA. At the center of the school's corrective action plan is restructuring and support of the school's internal organization as follows:

1. Implementation of a new school schedule to include daily remediation and enrichment periods;
2. More intensive monitoring of instruction and direct supervisory assistance by district level general education, special education, and Title I instructional staff;
3. Intensive and sustained staff development training in core content, co-teaching, data analysis and interpretation, differentiation of instruction, formative assessment, Words Their Way, and students of poverty provided by school, private providers, district, and T-TAC;
4. Implementation of Words Their Way Reading Program in grades K-3;
5. Implementation of extended planning seven day rotation in which remediation planning, data analysis, teacher communication, vertical planning, and staff development are included;
6. On-going monitoring of the school's systems and processes as they pertain to the delivery of instruction and student achievement.

Rationale:

The foregoing activities will provide more strategic support for teaching and learning. The school will benefit from professional development training that will be focused on targeted content and areas of weakness that have been identified through extensive data analysis. Formal and informal data will be used to assign students to daily remediation sessions. As teachers learn new ways of instruction, while building on best practices, student achievement will improve.
